

HCP Filter Cartridge

Strong and Hard Wearing

HCP dust filter cartridges open up new dimensions and possibilities in the design of modern dust extractors. Strong and hard wearing, the cartridges are designed for 'pulse-jet' cleaning.

For specific applications different filter media can be selected, including anti-static material, PTFE coating, specialty cellulose and polypropylene.

Optional top plate to suit HCP and Tenkay-syle cartridge mounting.

Construction

Depending on design either a diffuser plate or a wire cage is inserted into the inner cylinder, located in the clean section of the filter cartridge, to give added support. The top plate can either be cast aluminium or mild steel spinning.

Specially designed ventureries can be supplied where design considerations justify their selection. The filter cartridges can be supplied for mounting on the clean or dirty side of the dust collector's plenum.

Filter Cartridge

Material

85/15 Polyester/Cellulose Blend

Dimensions

324mm OD x 213mm ID x 9000mm Long

Efficiency

99.99% on 0.5 micron particles

Configuration

Open One End / Closed One End

AES Part No.

DCC325900 (900mm length)

The Company

AES Environmental is an Australian owned manufacturing business producing products under Clyde-Apac, Email Air Handling and Vokes brand names for industries that are as varied as industrial plants, commercial buildings, power stations, food processing, healthcare, science and electronics. AES Environmental considers the Australian Standards as a core component of its product mix and has developed an export market in 25 countries, promoting Australian Standards, engineering and manufacturing solutions. AES Environmental, a trusted manufacturer capable of delivering reliable product solutions to highly-critical applications, where the control of hazardous airborne contamination is often critical to process and personnel.
